

INNOVATORS WANTED

Wireless Systems
Embedded Systems
FPGA Design
Software Engineering

Silvus delivers unprecedented, battle-tested connectivity where failure is not an option. Join us as we build the future of MIMO Technology.

Our Advanced R&D team is the cornerstone of Silvus. Building on our deep roots with DARPA, we continue to drive groundbreaking Mobile Ad-Hoc Networking (MANET) solutions for military, first responders, law enforcement, and unmanned systems teams here in the USA and around the world. Come join our growing team in West Los Angeles and help us deliver unbreakable wireless mesh connectivity in the harshest of terrestrial, airborne, and subterranean deployments.
